See Attached and Below.

- EPA Response Activities – In response to the Lard Oil Spill, Property Assessment Forms and Properties have been loaded to the Event/Incident – Southern LA Flooding/EPA PreMission Assignment
  - To date 39 properties have been loaded all with current status of Oil Observed
  - See attached Map

State Assessments Status:

Drinking Water

Facilities Loaded into RM – 1349 (all of LA)

Facilities Assessed – 890

Facilities Operational – 837

Waste Water

Facilities Loaded to RM- 650 (Declared Parishes)

Facilities Assessed - 464

Facilities Operational - 206

State Facilities

Facilities Loaded to RM- 741 (Declared Parishes)

Facilities Assessed -277

Facilities Operational - 258

**Subject:** RE: SITREP Update

EPA continues to oversee Lard Oil Company on oil spill in Denham Springs

EPA responded to report of an oil spill in Abbeville, LA. It was determined that the material was organic matter and not oil.

EPA continues to coordinate with LDEQ for potential oil/hazmat responses related to flooding. The EPA has 2 Response Teams available for spill assessment activities.

LDEQ continues flood response operations. The activities planned or continue include landfill assessments, facility damage assessments (phone), WWTP assessments (phone), and planning for debris site assessments. The next steps will be ground assessments for those facility or WWTPs that they were unable to reach via phone assessments.

OSC Moore will transition to the JFO to replace OSC Brescia and provide dual coverage to JFO and LDEQ. OSC McAteer will arrive on Monday to replace OSC Moore at LDEQ. OSC Smalley will continue response oversight at Lard Oil Company oil spill.
